SUMMARY

Full-Stack Web Developer with hands-on experience building web applications using Python, Django, Django REST Framework, React, and relational databases. Skilled in designing REST APIs, implementing authentication and role-based access control, and developing practical applications across e-commerce, education, healthcare, and AI-powered systems. Focused on writing clean, maintainable code and building well-structured software solutions.

SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS, Java

Backend: Django, Django REST Framework, Django ORM, REST API, JWT Authentication

Frontend: React, React Router, Tailwind CSS, Context API, Vite, Bootstrap

Databases: MySQL, PostgreSQL, SQLite, Database Design & Normalization

Tools & DevOps: Git, GitHub, Linux, Postman, Render, Railway, Vercel, Netlify

Others: Authentication & Authorization, Role-Based Access Control (RBAC), API Integration

PROJECTS

SellFlow BD

F-Commerce Order & Delivery Management Platform (Django REST Framework, React, PostgreSQL)

Github : <https://github.com/jhraihan/SellFlowBD> 🔗

- Built a multi-tenant SaaS platform for managing orders, customers, inventory, courier deliveries, COD reconciliation, returns, and profit analytics from a unified dashboard.
- Implemented JWT authentication, capability-based role access, tenant isolation, transaction-safe inventory management, order state machine, courier API integration, and RESTful APIs with a React frontend.

Medi Desk

Hospital Management System (Django, DRF, React, PostgreSQL)

Github : <https://github.com/jhraihan/Medi-Desk> 🔗

- Full-stack hospital management platform for **patients, doctors, appointments, prescriptions, billing, and medicine inventory**.
- Implemented **JWT authentication and role-based access control** for Admin, Doctor, Patient, and Receptionist workflows, with protected React routing and RESTful API integration.

ServoraBd

Local Service Marketplace (Django REST Framework, React, PostgreSQL)

Github: <https://github.com/jhraihan/ServoraBD> 🔗

- Built a full-stack marketplace that connects customers with local service providers such as electricians, plumbers, and AC technicians, addressing the lack of reliable provider information and transparent service history.
- Implemented provider verification, trust-based ranking, availability, booking lifecycle, double-blind reviews, and cash settlement to help customers make informed decisions based on real platform activity.

EXPERIENCE

MicroMart E-Commerce Platform

Github : <https://github.com/jhraihan/MicroMart> 🔗

- Developed a full-stack e-commerce platform featuring **product catalog, search, filtering, PC Builder, cart, checkout, orders, reviews, and admin dashboard**.
- Built RESTful APIs with **Django REST Framework** and React/Vite frontend using a layered service architecture for centralized business logic.
- Implemented **transaction-safe inventory management and server-side payment verification** to prevent overselling and fraudulent payment confirmation.
- Maintained extensive automated testing with **1,372 backend tests, 62 frontend tests, and 13 Playwright E2E specs**.

EDUCATION

B.Sc. in Computer Science and Engineering (CSE)
Independent University, Bangladesh

09/2022 – 12/2026
Dhaka, Bangladesh

LANGUAGES

English(Professional Working Proficiency)

Bangla(Native)

CERTIFICATES

- Full Stack Web Development
with Python, Django & React -
Ostad
